1. Introduction

1.1 Context

As part of its strategic plan, Euronext Securities (Euronext Securities Milan as issuer CSD and investor CSD, wants to onboard French equities, which means that there needs to be a solution for French registered securities.

The main objective is to ensure that Euronext Securities Milan can provide a solution to the market that is developed and adapted by the market within an accelerated timeframe.

Also, to limit the impact on the market, participants should be able to:

- use one solution no matter where the place of issuance or the place of safekeeping
- use the current format/level of information to feed the providers solution

The platform is designed to manage the **Information on Registered Investors** (IRI) process flow efficiently. It gives clients a single point of contact for handling registered securities, streamlining communication between custodians and registrars. The platform also facilitates a reconciliation process to match IRIs with settlement instruction messages. Additionally, it enables the transmission of required information to other CSDs, such as Euroclear France's BRN platform.

1.2 Purpose

This document presents in a comprehensive manner the messages exchanged between the IRI platform and customers in the framework of the Euronext Securities Milan IRI project. It includes message structures, fields, validation and rejection rules, examples, relevant flows, and a glossary of technical terms.

1.3 Audience

The following table lists the target readers.

Audience	Responsibility
Development teams	Implementation and/or maintenance
Architects	Ensure compliance with architectural standards
Quality Assurance engineers	Designing tests strategies
Operational teams	Planning infrastructure
Security teams	Review and validate security controls

1.4 Reference Documents

The following table lists documents to be considered with this one.

Reference	Document name	Source
SDD	French registered shares service Description Document	Euronext Securities Milan
SDD	Securities account structure service Description Document	Euronext Securities Milan

1.5 Glossary

The following table lists all terms and abbreviations used in this document.

Term	Definition
ARS	Administered Registered Shares
BIC code	Bank Identification Code.
CCN	The CCN ("nominative current account") contains all information related to the holder of the securities (personal details, address, etc.) associated with the account. Each account is identified by a CCN number assigned when the account is opened. A CCN may have one or several holders, particularly when the account represents a joint ownership structure. If the account has a single holder, then the information relating to the account holder and the information relating to the registered owner are strictly identical. When an account includes multiple holders, each holder is identified separately.
Code SIREN/SIRET	French companies identification code.
CSD	Central Securities Depository.
DSS	Deferred settlement system.
DvP / RvP / DFoP / RFoP	Types of settlement instructions, indicating whether securities and/or cash are exchanged. The acronyms used in this document refer to the following: • Delivery Versus Payment (DvP) • Receive Versus Payment (RvP) • Delivery Free of Payment (DFoP)

Term	Definition
	Receive Free of Payment (RFoP).
ESM	Euronext Securities Milan.
GUI	Graphic User Interface.
IRI	Information on Registered Investors
ISIN	International Code of securities identification .
OST	Corporate actions
PTCS	Post-Trade Confirmation System.
TDR	Registrar, managing the shareholder register in the name of the issuer.
Transaction type code (TTC)	Transaction code, also referred as Code Type Operation (CTO) in the French registered shares service description document. Transaction type codes are mostly used in IRI and BRN messages, but also in settlement instructions in case of portfolio transfers. The list of these codes is provided in the French registered shares service description.

2. Messages

2.1 Messaging and client connectivity

Different channels allow Euronext Securities Milan participants and shareholders to exchange messages sharing Information on Registered Investors (IRIs).

For a given IRI, the channel used by the CSD participant and the channel used by the registrar can be different, as shown below.

In the following sections, the term *custodian* should be understood as referring to a CSD participant.

2.1.1 File based exchange

As part of Euronext Securities' commitment to ensure a smooth transition and continuity for existing users, the IRI platform will support the traditional file-based exchange format, consistent with the current models used in the French market for listed and non-listed Securities. This approach allows Clients to retain their existing operational workflows and benefit from a familiar, proven method of transmitting shareholders information.

2.1.2 Dedicated GUI

A specific GUI allows participants and registrars to:

- Consult the status of each IRI transmitted via the different channels
- Create or update the IRIs, instead of using File Transfer or API
- Request a dedicated report for control or reconciliation.
- Request for stock reconciliation.

2.2 Message content and structure

Each message must have the following structure:

- a heading, which is consistent across all messages circulating on the network Euronext Securities Milan IRI
- an application part, forming the body of the transaction.

2.2.1 Messages conventions

Field alignments / Applied standards	
Alphanumerical Type (AN)	Align to the left, filling the right with spaces. Optional fields of this type that are not filled should remain blank.
Numerical Type (N)	Align to the right, filling the left with zeros. Optional fields of this type that are not filled should start with zero.
Dates Following ISO 2014 standard	Align to the right, filling the left with zeros. Optional fields of this type that are not filled should start with zero.
Time	Time should be in the HHMMSS format. These digital fields must start with zero if not filled. Time in UTC format.
Quantities, and Rates	These are expressed without decimal points, spaces, or commas and are never signed. Amounts linked to a currency code are expressed with the number of decimals as per the currency (ISO 4217 standard). However, when greater precision is needed, a "format" attribute is used, allowing for more decimals than the currency standard. The "format" attribute takes precedence in such cases.
Codes structure	
Institution Code	This code uses twelve alphanumerical characters, formatted as: 4 zeros + ex-member code (8 numerical positions).
Participant Code	This code uses eight numerical characters. It is populated with the CED code of the Participant (Please refer to Euronext Securities Milan back-office for any query on this matter).

Field alignments / Applied standards	
Security Code	This code uses twelve alphanumerical characters, applicable only to the ISIN, assigned by the authorised National Numbering Agency.
Currency Code	This code conforms to ISO 4217, using 3 alphanumerical characters.

2.2.2 Types of controls conducted

Euronext Securities Milan IRI Platform validates messages based on and the transaction code. Validation checks are performed field by field, following what described in this document.

2.2.3 Format control

Numerical field:

1. If optional, it must be numerical but can be filled entirely with zeros.
2. If reserved, it must be filled entirely with zeros.
3. If mandatory, it must be numerical and no zero.

Alphanumerical Field:

1. If optional, it must contain alphanumerical characters.
2. If reserved, it must be filled entirely with blanks.
3. If mandatory, it must contain only alphanumerical characters and at least one nonblank character.

The ranges of letters and numbers are provided below:

Types of characters	Possible values
Numerical	0.....9
Alphanumerical	0.... 9, a, b,....y, z, A, B,....Y, Z, @, blank, +, -, etc.

2.2.4 Application validation

This validation may be carried out when the transactions are received and/or during the processing of the transactions by the various sub-systems.

There are two kinds of application validation:

2.2.4.1 Validation at reception

This validation is carried out when a transaction is received and validates the:

- presence of required fields
- respect of format rules (numbers, letters, etc. for all fields filled in whether by requirement or by choice, and
- respect for the interdependence of attributes rules.

Transactions that do not conform to these rules are immediately rejected.

2.2.4.2 Validation against the Euronext Securities Milan IRI referential

This validation is carried out when the transaction is received and renewed on a daily basis. The objective is to verify the validity of the transaction against the most recent version of the Euronext Securities Milan IRI databases (modifications of some reference data are managed in the 'archive' section).

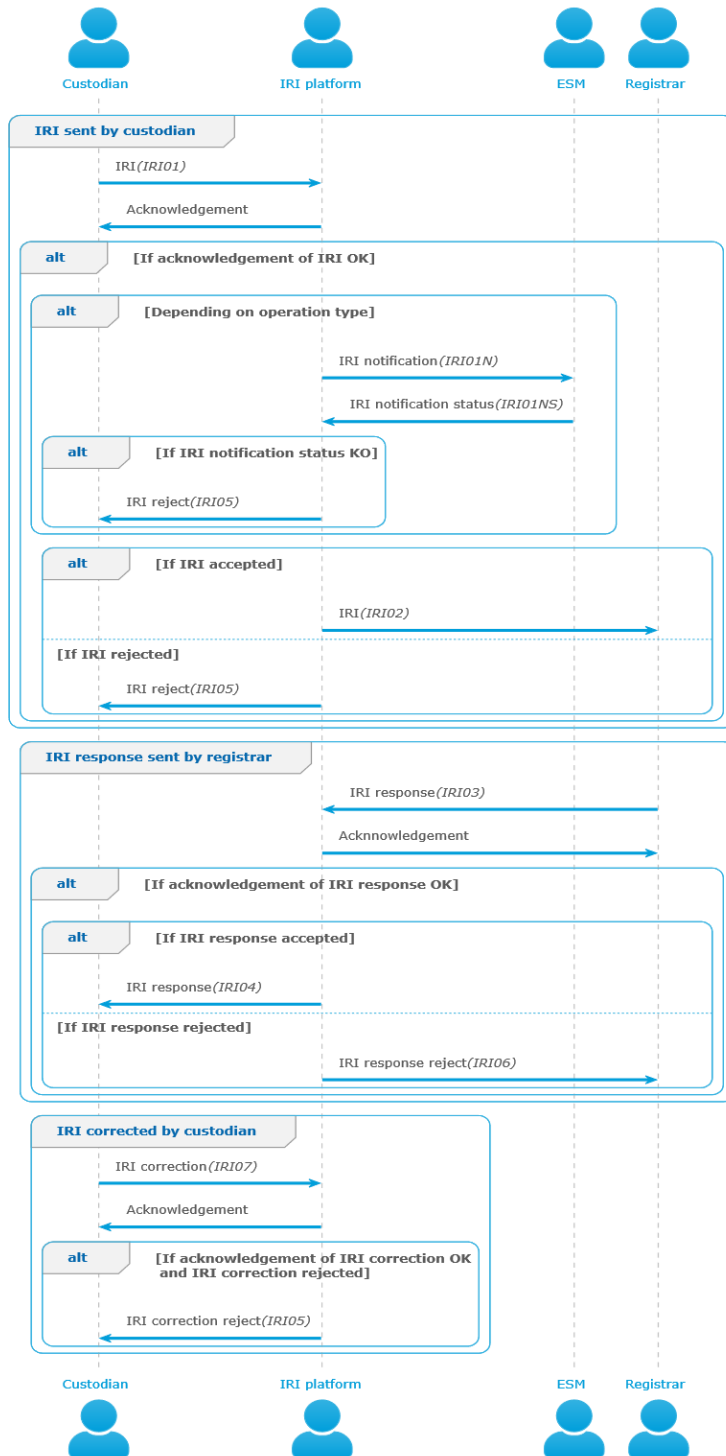

This validation is especially for the:

- Sender ID information
- Receiver ID information
- Security Code (ISIN)
- Currency Code (EUR).

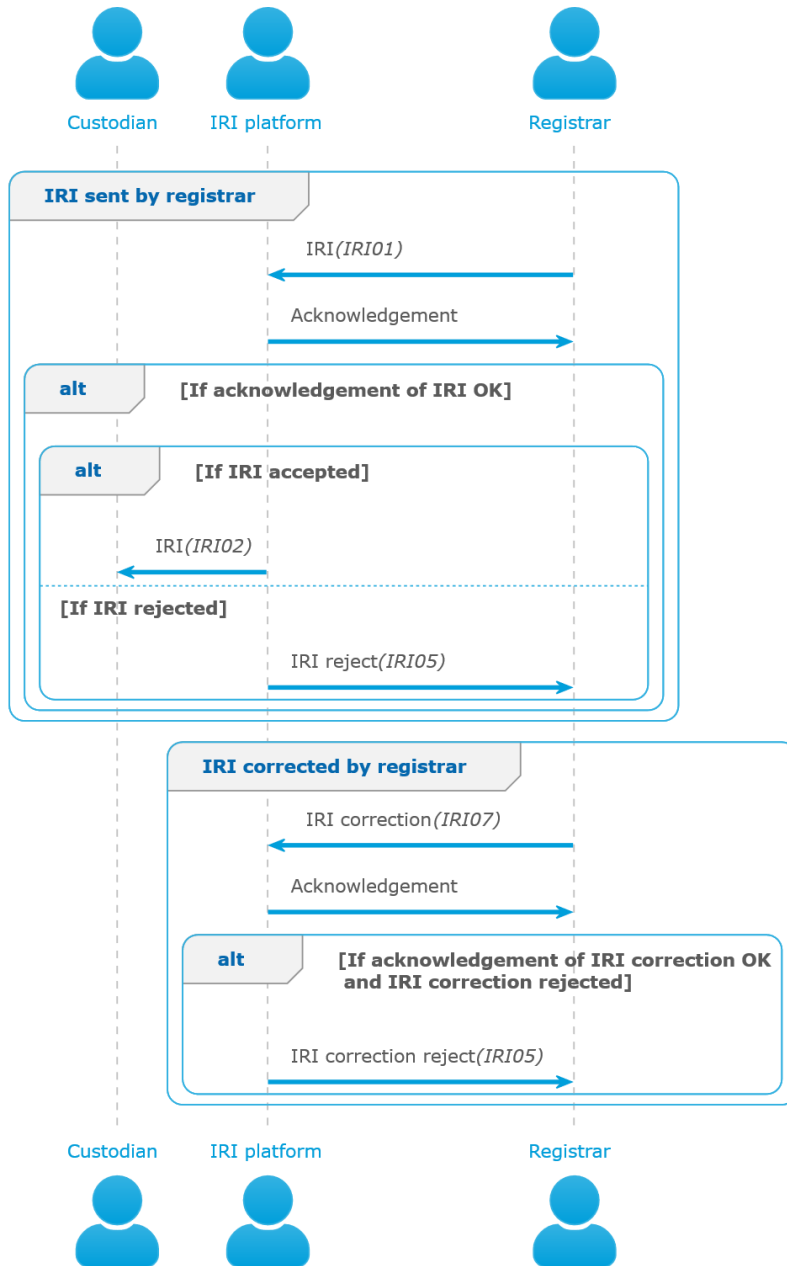

2.3 Sequence diagrams for key flows

2.3.1 Euronext Securities Milan as issuer CSD

2.3.1.1 Flows initiated by the custodian

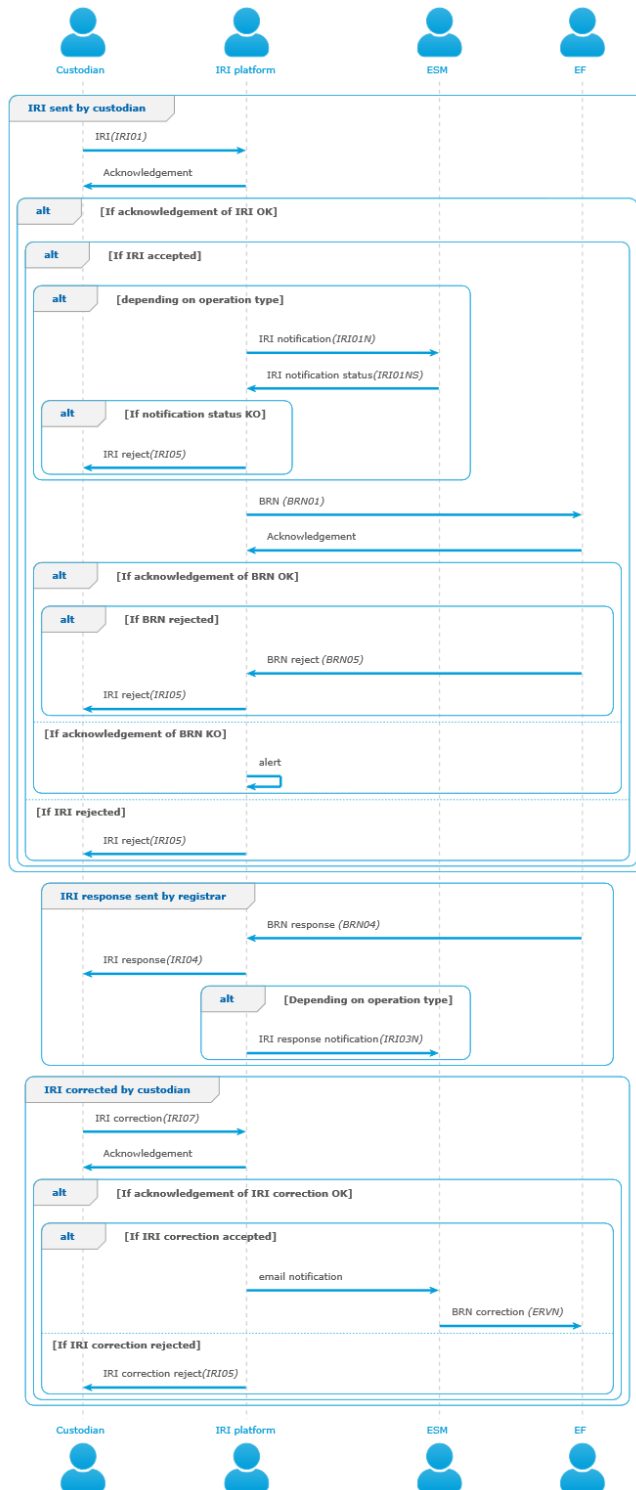

2.3.1.2 Flows initiated by the registrar

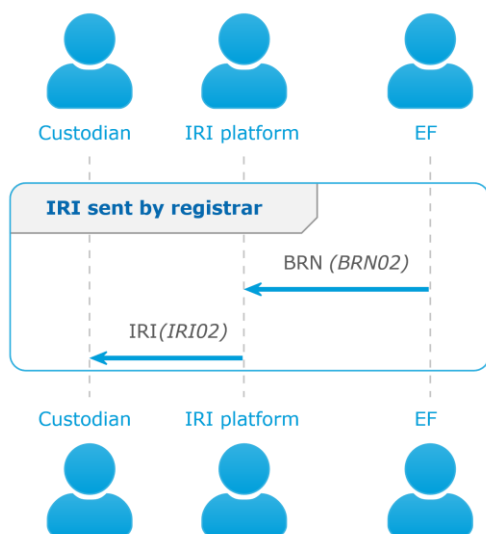

2.3.2 Euronext Securities Milan as investor CSD

2.3.2.1 Flows initiated by the participant

2.3.2.2 Flows initiated by the issuer CSD

2.4 List of messages of the IRI platform

Reference	Purpose of the message
IRI 01	Transmission of characteristics of a shareholder (individual or legal entity), including identity, address, and any restrictions. Used to initiate or regularize a registration with the registrar via the IRI platform.
IRI 02	Transmission of an IRI01 forwarded of an IRI02, sent by the issuer to the platform.
IRI 03	Issuer's/Registrar's acceptance/refusal of an IRI02, sent by the issuer to the platform.
IRI 04	Issuer's/Registrar's acceptance/refusal of an IRI02, transmitted by the platform to the custodian.
IRI 05	Notification of rejection of a registration by the IRI platform, including the rejection code, reason, and date. Informs the custodian/registrar of issues to be corrected.
IRI 06	Notification of rejection of a response from the registrar (IRI 03) by the IRI platform, including the rejection code, reason, and date. Informs the registrar of an issue in their response.
IRI 07	Transmission of a regularization or correction of a registration following a rejection (e.g., correction of an error detected in a previously rejected IRI 01 or 02).

Reference	Purpose of the message
Acknowledgment	Technical acknowledgment from the IRI platform, confirming receipt and validation (or not) of a message exchange (PACK/NACK), with an optional reason code and comment.

3. IRI

The following sections detail the data models, APIs, and workflows involved.

3.1 IRI structure

The IRI is a set of organized data used to facilitate the transmission of shareholders information in a formatted way between custodians and registrars for .

An IRI message must be transmitted for each eligible operation, from the custodian to the registrar via the IRI platform. Once the registrar receives an IRI, the registrar can accept or reject it and send back the answer to the custodian via the IRI platform.

The IRI includes key data such as:

- ISIN
- CCN
- Shareholder identity (name, address, etc..)
- Legal nature of the rights held
- Any restrictions on the securities
- Data end type of transaction
- Quantity of securities involved in the operation
- Any other applicable information.

An IRI is a fixed-width text structure that can include one or more lines with a fixed-width text compound of one or several lines.

3.2 IRI 01

The IRI 01 file has 3 sections each with the following data categories:

- The IRI "header" section in which the general characteristics of the IRI are listed, such as the Value code, the IRI number, the custodian's delivery code or the number of records in the file.
- The "registration of a natural or legal person" section in which the characteristics of the holder (such as surnames, first names and addresses are listed).
- Possibly the "restriction" sections in which the legal characteristics of the holder are listed (such as the restriction code or surnames, first names and addresses). The restriction dataset can have 0 or N occurrences.

Each section of the same IRI is composed of 4 elementary zones:

- Custodian delivery code

- Submitted file number
- IRI Number
- Record type.

Upon receipt of this IRI 01 - IRI file issued, the IRI platform verifies the presence and consistency of the mandatory attributes on each record. If the controls are satisfactory, the IRI platform creates an IRI02 to transmit it to the registrar. If the checks are not satisfactory, the file is then returned to the IRI registrar via an IRI05.

Custodians must reissue an IRI 01 to regularize an IRI 01 rejected by the registrar. This new IRI 01 can also be accepted or rejected by the registrar. In this case, the regularization process will apply again.

3.2.1 IRI 01 - head section

3.2.1.1 Fields presentation

Id	Data field (EN)	Data Field (FR)	Length & type	Mandatory / Optional	Rules
1	Participant Delivery code	Code livreur du Participant	8 N	M	The rule will be 620 + XXXXX which mayb be equal to the participant code in ESES. In case the participant is not in ESES the 5 digits code will be assigned during the onboarding process
2	Batch number	Numéro du fichier transmis	5 N	M	
3	IRI number	Numéro de l'IRI	18 N	M	Fed by the custodian, with the first four characters filled by zeros (0000)
4	Record type	Type d'enregistrement	1 N	M	
5	Number of registrations and restrictions	Nombre d'immatricules et de restrictions	2 N	M	

Id	Data field (EN)	Data Field (FR)	Length & type	Mandatory / Optional	Rules
6	Reference date for corporate actions	Date de reference pour les OST	8 N	O	
7	Securities Account type	Type d'intitulé de compte code	1 N	M	
8	ISIN code	Code ISIN	12 AN	M	
9	Execution date	Date d'inscription dans le registre	8 N	M	
10	Counterparty institution code	Code receuteur du Participant	8 N	M	The rule will be 620 + XXXXX which mayb be equal to the participant code in ESES. In case the participant is not in ESES the 5 digits code will be assigned during the onboarding process If the counterparty is in ESES, the affiliated code must be provided.
11	Securities quantity	Quantité	15 N	M	
12	Transaction direction	Sens de l'opération	1 AN	M	
13	Investor Identifier	Identifiant de l'investisseur	23 AN	M

3.5.1.2 Field definition

Reject Code

Registrar Reject code	Meaning	Label de rejet du TDR
11	Insufficient provision	Défaut de provision
12	Securities Account does not match the identifier of the IRI	Intitulé de compte ne correspond pas au numéro de l'identifiant de l'investisseur dans l'IRI
13	Holder deceased – submit the succession file	Investisseur décédé – Envoyez un dossier de succession
14	Lower quantity than the assets registered at the registrar	Quantité inférieure aux avoirs enregistrés dans le registre
15	Pledged securities – free these securities	Titres nantis – main levée à effectuer
16	Rejection not tracked (conversion)	Rejet de conversion
41	Failure to present supporting documents within the set timeframe	Rejet pour absence de présentation des pièces justificatives
42	Rejection of a file – error in part of the file	Rejet de dossier – erreur sur une partie du dossier
43	Other – rejection of a file with comments	Divers – rejet d'un dossier avec commentaire

Registrar Reject code	Meaning	Label de rejet du TDR
51	Securities Account does not match the identifier of the IRI	Intitulé de compte ne correspond pas au numéro de l'identifiant de l'investisseur dans l'IRI
52	Address different for this identifier	Adresse différente de celle enregistrée dans le registre
53	Address incomplete	Adresse incomplète
54	Account title not accepted	Intitulé de compte non accepté
56	Rejection - Confirmation of actual ownership required	Rejet - Confirmation de la propriété nécessaire
58	Account title does not comply with AFB standards	Intitulé de compte non conforme aux normes AFB
60	Rejection not tracked (conversion)	Rejet conversion porteur ou nominatif administré vers le nominatif pur
99	Other	Rejets divers non répertoriés par un code spécifique

3.6 IRI 05

Upon receiving IRI01 files and consistent. It rejects IRIs that appear to have faults and returns them to the member that sent the IRI.

Platform IRI returns all records in the incorrect IRI sent and adds the reason for the rejection of the IRI and the rejection date on each record.

3.7 IRI 06

3.7.1 IRI 06 – content

Upon receiving the IRI03 file, IRI Platform checks that the mandatory fields in each record are populated and consistent. It rejects IRIs that appear to have faults and returns them to the member that sent the IRI file.

IRI Platform returns all the records in the incorrect IRI sent and adds the reason the IRI is rejected and the rejection date on each record.

4. Detailed Description of Data Fields

Each data field is explained on a separate description sheet.

4.1 Building

Title	Length	Type
Building	32	AN

Definition

This field provides additional information about the investor's address. It contains information that facilitates postal delivery, such as the number or letter of a building, block, stairwell or entrance, or the name of a subdivision or building group.

This field is optional.

Function: not applicable.

Range of values: not applicable.

Occurrences: not applicable.

4.1.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.2 Check digit

Title	Length	Type
Check digit	2	N

Definition

The check digit is a two-digit number that can be used to check that the "identifier" field has been entered properly.

This field is optional, but highly recommended.

Function

The participant who issues the IRI enters the digit recorded at his premises. The addressee of the IRI calculates the digit associated with the identifier entered and compares it with the check digit entered on the IRI.

A check digit should not be entered (i.e. it must be 00) if an identifier has not been entered (i.e. the identifier field contains only zeros).

Range of values

If a check digit is entered, it must be calculated according to the "Modulo 97" method (the algorithm used to calculate the check digits for bank account references). The digit is obtained by:

- multiplying the identifier by 100
- dividing the product by 97
- subtracting the result from the number 97.

Occurrences: not applicable.

4.2.1 Transaction category 1

IRI file	
IRI01	Header
IRI02	Header
IRI03	
IRI04	

4.2.2 Transaction category 2

IRI file	
IRI01	Header
IRI02	Header

4.3 Accepted/rejected code

Title	Length	Type
Accepted/rejected code	2	N

Definition

This code indicates the response given by the registrar to the custodian who initiated the IRI. For conversions of securities from bearer form to administered book-entry form and vice versa, this code can also indicate to the IRI Platform that it must create the FOP associated with the IRI.

This field must be populated.

Function

This field indicates to the custodian who initiated the IRI whether the IRI has been accepted or rejected by the registrar and, if rejected, the reason that the securities cannot be registered or deregistered.

The rejected codes must have a value between 11 and 19 inclusive for IRIs for deregistration and between 51 and 99 inclusive for IRIs for registration.

In addition to these rejection codes.

- the codes 14 (for an IRI for deregistration) and 41 (for IRIs for deregistration or registration) are reserved for succession files.
- the codes 42 and 43 (for IRIs for deregistration or registration) are reserved for succession files, direct transfers and change of securities account.

The codes 16 for a IRI for deregistration for conversions (SC, CC) and 60 for a IRI for registration for conversions (SB, CB), indicate that the rejection is not tracked by the registrar or by IRI Platform and that the custodian needs not produce an adjusted IRI.

The other reject codes indicate that the rejection is tracked by the registrar and by IRI Platform (except for IRIs involving changes to the securities account or address) and that the custodian must produce an adjusted IRI.

The accepted codes 03 and 04 -- reserved for corporate actions (A1, D1, M1, S1, O1 and OJ) -- indicate that the registrar can request Euronext Securities Milan to create the FOP associated with the IRI.

Range of values

Code	Meaning
01	Accepted
02	Accepted with comments
03	Accepted – creation of FOP by IRI Platform
04	Accepted with comments - creation of FOP by IRI Platform
11	Insufficient provision
12	Account title does not match the identifier of the IRI
13	Investor deceased – submit the succession file
14	Lower quantity than the assets registered at the registrar
15	Pledged securities – free these securities
16	Rejection not tracked (conversion)

Code	Meaning
19	Other
41	Failure to present supporting documents within the set timeframe
42	Rejection of a file – error in part of the file
43	Other – rejection of a file with comments
51	Account title does not match the identifier of the IRI
52	Address <> the same as that in our files for this identifier
53	Address incomplete
54	Account title not accepted
56	Confirmation of actual ownership required
57	Failure to comply with the provisions of Articles L. 322-324
58	Account title does not comply with AFB standards
59	Approval not granted
60	Rejection not tracked (conversion)
99	Other

Occurrences: not applicable.

4.3.1 Transaction category 1

IRI file	
IRI03 and IRI04	

4.4 Registrar code

Title	Length	Type
Registrar code	8	AN

Definition

This is the member code of the securities registrar or its agent. This field must be populated by the registrar when he issues his response. It must be the same as the "IRI addressee code" in the IRI02 file.

This field must be populated.

Function: not applicable.

Range of values: IRI Platform Members' Directory (*Répertoire des Affiliés de l'IRI Platform*).

Occurrences: not applicable.

4.4.1 Transaction category 1

IRI file	
IRI03 and IRI04	

4.5 Counterparty institution code

Title	Length	Type
Counterparty institution code	8	AN

Definition

This is the member code of the counterparty institution to the transaction (for sub-members, this is the agent).

This field must be populated.

Function

The value of this field depends on the transaction underlying the IRI (see SDD French Registered Securities). For a PTCS trade, for example, the custodian must indicate the code of the clearing broker firm.

Range of values: IRI Platform Members' Directory.

Occurrences: not applicable.

4.5.1 Transaction categories 1 and 2

IRI file	
IRI01 & IRI02	Header

4.6 Participant Delivery Code

Title	Length	Type
Participant Delivery Code	8	AN

Definition

In general, this is the member code recorded by the registrar to refer to the participant of the investor's securities. For conversions of securities from pure book-entry form to administered book-entry form (TTC CC and SC for registration), alignments prior to the payment of a loyalty premium (TTC RA for registration), or bilateral alignments – from registrar to custodian - (TTC R2 for registration), this code is the same as the registrar code.

This field must be populated.

Function

This field's value must be consistent with that of the "counterparty institution code". In the case of an internal transfer, for example, the custodian code and the counterparty institution code must be the same.

Range of values: IRI Platform Members' Directory.

Occurrences: not applicable.

4.6.1 Transaction category 1

IRI file	
IRI01	Header Registration Restriction
IRI02	Header Registration Restriction
IRI03 IRI04 IRI07	

4.6.2 Transaction category 2

IRI file	
IRI01	Header Registration Restriction
IRI02	Header Registration Restriction

4.7 IRI addressee code

Title	Length	Type
IRI addressee code	8	AN

Definition

This is the code of the member designated by ES-M as the addressee of the IRI.

- When the IRI is created by a custodian, this is the member code of the registrar who is managing the security at the date on which the IRI is sent.
- When the IRI is created by a registrar, this is the code of the custodian to whom the IRI is addressed.

This field must be populated.

Function: not applicable.

Range of values: IRI Platform Members' Directory.

Occurrences: not applicable.

4.7.1 Transaction categories 1 and 2

IRI file	
IRI02	Header Registration Restriction

4.8 Nationality code of the shareholder

Title	Length	Type
Nationality code of the shareholder	3	AN

Definition

This code indicates the nationality of the holder.

In general, this field is optional. However, it must be input in certain cases (**see SDD French Registered Shares**). For example, it must be input on the "registration" record if the identifier is not input or when a "complete securities account" is required.

Function

This field indicates the nationality of the shareholder to the registrar who manages the security.

Range of values

If this field is input, its value must conform to the ISO 3166 standard.

Occurrences: not applicable.

4.8.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.9 Country code of the address

Title	Length	Type
Country code of the address	3	AN

Definition

This code indicates the investor's country of residence.

In general, this field is optional. However, it must be completed in certain cases (**see SDD French Registered Shares**). For example, it must be completed in the "registration" record if the identifier is not input or when a "complete account title" is required.

Function

Its main function is to enable the registrar who manages the security to know the breakdown by category of shareholders.

Range of values

If this field is populated, its value must conform to the ISO 3166 standard.

Occurrences: not applicable.

4.9.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.10 Postal code

Title	Length	Type
Postal code	5	AN

Definition

This field supplements the "city" field.

In general, this field is optional. However, it must be completed in certain cases (**see SDD French Registered Shares**). For example, it must be completed, in numeric form, between 00000 and 95999 if the "country code of the address" is "FRA" (France) or "FXX" (mainland France).

Function: not applicable.

Range of values

If this field is populated, its value must conform to postal standards.

Occurrences: not applicable.

4.10.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.11 Investor type

Title	Length	Type
Investor type	2	N

Definition

The value of this field defines the status of a physical or legal person on a record. This field must be populated on "registration" records.

Function

Its main function is to enable the registrar who manages the security to know the breakdown by category of his shareholders.

Range of values:

Code	Meaning
01	Company
02	Foreign correspondent
03	Mr
04	Mrs/Ms
05	Miss/Ms

Code	Meaning
06	Mr and Mrs
07	Other
08	Mr or Mrs

Occurrences: not applicable.

4.11.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.12 Reject code

Title	Length	Type
Reject code	3	AN

Definition

This code, which is associated with a reason for the rejection, indicates that the IRI has been rejected by ES-M.

This field must be populated in all records of the rejected IRI.

Function

This field, associated with the reason for the rejection, enables the participant to identify the fault that caused the IRI to be rejected by ES-M.

Range of values:

(see following pages: codes arranged in numeric order for each type of file).

Occurrences: not applicable.

4.12.1 Transaction category 1

IRI file	
IRI05	Header Registration Restriction
IRI06	

4.12.2 Transaction category 2

IRI file	
IRI05	Header Registration Restriction

Range of values: Codes and meanings for the IRI05 file – Rejection of IRI sent.

Reject	Meaning
	Codes associated with the data
001	Custodian code illegible
002	Custodian code mandatory
003	Custodian code non-existent
004	Custodian code inconsistent
005	Custodian code not authorized for book-entry registration
006	Custodian code must be an Administrator Intermediary
007	Custodian code must be different from the counterparty code
008	Custodian code must be the same as the counterparty code
009	Batch number illegible
010	Batch number mandatory
011	Batch number out of sequence
012	IRI number illegible
013	IRI number mandatory
014	IRI number must be different from the number of the adjusted IRI
015	Record type illegible
016	Record type must be 1, 2, or 3
017	Number of registrations and restrictions illegible
018	Number of registrations and restrictions mandatory
019	Number of registrations and restrictions incorrect
020	Reference date for corporate actions illegible
021	Reference date for corporate actions mandatory

Reject	Meaning
	Codes associated with the data
022	Reference date for corporate actions must be a trading day
023	Reference date for corporate actions must be more than 40 trading days before the accounting day
024	Reference date for corporate actions must be at or before the ES-M accounting day
025	Account title type illegible
026	Account title type mandatory
027	Account title type non-existent
028	Inconsistency between the AT type and the number of records
029	Inconsistency between the AT type and the investor type
030	Inconsistency between the AT type and the restriction code
031	Security code illegible
032	Security code mandatory
033	Security code non-existent
034	Security deleted from ES-M
035	Security must be "exclusively registered" (essentiellement nominative)
036	Security must be exclusively registered ("essentiellement nominative") or occasionally registered shares form ("occasionellement nominative")
038	Security (quotation class) inconsistent
039	Security (method of payment) inconsistent
040	Security must be listed on the monthly settlement market
041	Security code not authorized for this transaction type code
042	Execution date illegible
043	Execution date mandatory
044	Execution date must be a trading day
045	Execution date must be the same as that for the original IRI
046	Execution date must be earlier than or the same as the ref. date for corporate actions

Reject	Meaning
047	Execution date must be the last trading day of the month
048	Execution date incompatible with TTC
049	Counterparty code illegible
050	Counterparty code mandatory
051	Counterparty code non-existent
052	Counterparty code inconsistent
053	Counterparty code not authorized for book-entry
054	Counterparty code must be Pure Trader or Broker Firm
056	Securities quantity illegible
057	Securities quantity mandatory
058	Securities quantity must be populated with zeros
059	Securities quantity must be the same as the original quantity
060	Transaction direction illegible
061	Transaction direction mandatory
062	Transaction direction must be registration or deregistration
063	Transaction direction must be deregistration
064	Transaction direction must be registration
065	Transaction direction must be the same as the original direction
066	Identifier illegible

Reject	Meaning
	Codes associated with the data
067	Identifier mandatory
068	Identifier or number of the IRI for registration mandatory
069	Check digit illegible
070	Check digit does not comply with Modulo 97
071	Accounting day for the IRI of registration illegible
072	Accounting day for the IRI of registration must be a trading day

Reject	Meaning
073	Accounting day for the IRI of registration must not be populated
074	Number of the IRI for registration illegible
075	Number of the IRI for registration mandatory
076	Number of the IRI for registration must not be populated
077	Transaction type code illegible
078	Transaction type code mandatory
079	Transaction type code non-existent
080	TTC incompatible with the original TTC
081	Direction of adjusted IRI illegible
082	Direction of adjusted IRI mandatory
083	Direction of adjusted IRI incorrect
084	Direction of adjusted IRI must be registration or deregistration
085	Direction of adjusted IRI must be left blank
086	Execution date of adjusted IRI illegible
087	Execution date of adjusted IRI mandatory
088	Execution date of adjusted IRI must be a trading day
089	Execution date of adjusted IRI must be left blank
090	Execution date of adjusted IRI must be the same as the one of the IRI
091	Accounting day for adjusted IRI illegible
092	Accounting day for adjusted IRI mandatory
093	Accounting day for adjusted IRI incorrect
094	Accounting day for adjusted IRI must be a trading day
095	Accounting day for adjusted IRI must be left blank
096	Adjusted IRI number illegible
097	Adjusted IRI number mandatory
098	Adjusted IRI number must be left blank
099	Details of contact person illegible
100	Details of contact person mandatory

Reject	Meaning
101	Registrar's internal reference for the IRI illegible
102	Registrar's internal reference for the IRI (cont.) illegible
103	Reference for the associated securities movement illegible
104	Reference for the associated securities movement mandatory
105	Ref. for the associated securities movement must be the same as that on the original IRI
106	IRI Platform reference for the associated IRI illegible
107	IRI Platform reference for the associated IRI mandatory
108	IRI Platform reference for the associated IRI non-existent
109	Custodian's comments illegible
110	Record order number illegible
111	Record order number out of sequence
112	Number of restrictions attached to this registration illegible
113	Investor type illegible
114	Investor type mandatory
115	Investor type non-existent
116	Surname or Corporate name illegible
117	Surname or Corporate name mandatory
118	Forename or Corporate name illegible
119	Maiden name or corporate name illegible
120	Woman's forename or corporate name illegible
121	Nationality code of investor illegible
122	Nationality code of investor non-existent
123	Country code of address illegible
124	Country code of address non-existent
125	Building illegible
126	Street illegible
127	Additional address information illegible

Reject	Meaning
128	Postal code illegible
129	Postal code mandatory
130	Postal code must be between 00000 and 95999
131	City illegible
132	City mandatory
133	Personal title illegible
134	Restriction code illegible
135	Restriction code mandatory
136	Restriction code non-existent
137	Inconsistency between restriction code and another field
138	Inconsistency between restriction code and the number of restrictions
139	Inconsistency between restriction code and investor type
140	Date restriction ends illegible
141	Date restriction ends mandatory
142	Date restriction ends must be left blank
143	Security must be occasionally registered shares form ("occasionellement nominative")
144	Custodian code must be the same as registrar code
145	Counterparty code must be the same as registrar code
146	Duration of holding illegible
147	Duration of holding non-existent
148	Duration of holding must be left blank
149	Duration of holding mandatory
150	Date of transfer to bearer reached
151	Account-type '099' transfer date reached
152	Forename mandatory
153	Security code/TTC/Execution date not found in the Corporate Actions Table
154	Security code not found in the Alignments Table

Reject	Meaning
155	Execution date must be the same as or later than the date of the start of alignment
156	Record of repayment NT mandatory for TTC NA
157	Account-keeper code illegible
158	Account-keeper code mandatory

Reject	Meaning
	Codes associated with the data
159	Account-keeper code non-existent
160	Inconsistency between account-keeper code and custodian code
161	Security (class) inconsistent
162	Inconsistency between account title type and custodian
163	Transaction reference mandatory
164	Transaction reference illegible
165	Counterparty code must be 00000001
500	IRI in duplicate in the same batch
501	Header record missing
502	Sender of IRI must be the manager of the security
503	Account title must be complete
504	IRI TO/TM for registration already received
505	Rejected IRI non-existent
506	Rejected IRI already adjusted
507	First record of the account title must be a registration
508	Inconsistency between registration and restriction
509	Inconsistency between response and IRI TO/TM for registration received
510	Inconsistency between security code and reference date for corporate action
511	Inconsistency between identifier and check digit
512	Transaction type code reserved for a security conferring a loyalty premium
513	Inconsistency between duration of holding and number of periods set
514	Specific security code and transaction type code incompatible
515	Unauthorized use of specific security code
516	Unauthorized custodian for a security conferring a loyalty premium
517	Duration of holding not yet expired
518	File incomplete
520	Transaction reference must be the same as for the original IRI

Reject	Meaning
600	Registrar code illegible
601	Registrar code mandatory
602	Registrar code wrongly changed
603	Custodian code illegible
604	Custodian code wrongly changed
605	Batch number illegible
606	Batch number wrongly changed
607	IRI number illegible
608	IRI number wrongly changed
609	Reference date for corporate action illegible
610	Reference date for corporate action wrongly changed
611	Security code illegible
612	Security code wrongly changed
613	Execution date illegible
614	Execution date wrongly changed
615	Accounting day for the IRI illegible
616	Accounting day for the IRI wrongly changed
617	Securities quantity illegible
618	Securities quantity wrongly changed

Reject	Meaning
	Codes associated with the data
619	IRI Platform reference for the IRI illegible
620	IRI Platform reference for the IRI mandatory
621	Registrar's internal reference for the IRI illegible
622	Registrar's internal reference for the IRI wrongly changed
623	Registrar's internal reference for the IRI (cont.) illegible
624	Registrar's internal reference for the IRI (cont.) wrongly changed
625	Date IRI recorded at registrar illegible
626	Date IRI recorded at registrar mandatory
627	Date IRI recorded at registrar must be earlier than or the same as the return accounting day
628	Identifier illegible
629	Identifier mandatory
630	Check digit illegible
631	Check digit does not comply with Modulo 97
632	Accepted/rejected code illegible
633	Accepted/rejected code mandatory
634	Accepted/rejected code non-existent
635	Accepted/rejected code must be 01 or 02
636	Inconsistency between accepted/rejected code and transaction direction
637	Comments 1 illegible
638	Comments 2 illegible
639	Comments 2 mandatory
640	Comments 1 or 2 mandatory
641	Details of contact person illegible
642	Details of contact person mandatory
643	Response sent in duplicate
644	IRI sent not found

Reject	Meaning
645	IRI sent already responded
646	Inconsistency between identifier and check digit
647	Inconsistency between accepted/rejected code and transaction type
648	Insufficient securities provision for the FOP generated
649	Response to file incomplete
650	Inconsistency between accepted/rejected code of a file
651	Format of comment is invalid

4.13 Restriction code

Title	Length	Type
Restriction code	2	AN

Definition

The restriction code indicates a legal status that restricts the rights of the shareholder. There are three categories of restriction:

- restrictions relating to the investor's person,
- restrictions relating to usufruct and naked ownership,
- other restrictions.

There can be a combination of restrictions. This field must be populated.

Function

Depending on the legal status of the investor, the "restriction" records in the securities account of the IRI should appear:

- immediately after the "registration" record of the investor (physical or legal person) concerned, when the restriction relates to the investor's person (e.g. a minor).
- immediately after the "registration" record of each investor (physical or legal person) concerned, when the restriction relates to a usufruct and naked ownership.
- at the end of the IRI, when the restriction is of another type (e.g. profit-sharing plan).

Range of values

The value of this field depends on the type of restriction.

(see following pages: codes classified by category, legal status and associated data).

Occurrences: not applicable.

4.13.1 Transaction categories 1 and 2

IRI file	
IRI01	Restriction
IRI02	Restriction

Range of values: (cont.)

Restriction codes attached to the holder:

Code	Legal status	Holder type	Surname/Corporate name
	Minors		
AL	Natural guardianship (authority of both parents)	03, 04, 05, 06 or 08	of the natural guardian
AJ	Tutorship by nature (authority of one parent)	03, 04, 05, 06 or 08	of the tutor by nature
AS	Special guardianship	03, 04, 05, 06 or 08	of the special guardian
TT	Testamentary guardianship	03, 04, 05, 06 or 08	of the testamentary guardian
TL	Statutory guardianship	03, 04, 05, 06 or 08	of the statutory guardian
TD	Under a guardian appointed by the family council	03, 04, 05, 06 or 08	of the appointed guardian
TX	Under more than one type of guardianship	03, 04, 05, 06 or 08	guardian of the estate but not of the person
TP	Wards of the state	blank	blank
TG	Trusteeship	01, 02 or 07	of the trustee
ME	Emancipated minors	blank	blank
	Protected majors		
SJ	Under power of attorney	01, 02, 03, 04, 05, 06, 07 or 08	of the agent
CU	Under curatorship	03, 04, 05, 06 or 08	of the curator
CS	Under curatorship ad hoc	03, 04, 05, 06 or 08	of the curator ad hoc

Code	Legal status	Holder type	Surname/Corporate name
TN	Under natural guardianship (authority of both parents)	03, 04, 05, 06 or 08	of the natural guardian
TA	Under a guardian appointed by the family council	03, 04, 05, 06 or 08	of the appointed guardian
TJ	Under tutorship by nature (authority of one parent)	03, 04, 05, 06 or 08	of the tutor by nature
TE	Under partial guardianship	01, 02, 03, 04, 05, 06, 07 or 08	of the partial guardian
HF	Family empowerment	01, 02, 03, 04, 05, 06, 07 or 08, blank	of the legal tutor
	Absence		
AB	Declared	blank	blank
AP	Presumed	01, 02 or 07	of the provisional administrator
	Other		
RE	Bare trusteeship	01, 02 or 07	of the beneficiary

Range of values: (cont.)

Restriction codes attached to a usufruct and naked ownership:

Code	Legal status	Holder type	Surname/Corporate name
NP	Joint naked ownership (#)	01, 02, 03, 04, 05, 06, 07 or 08	of the naked owner
UT	Full usufruct (#)	01, 02, 03, 04, 05, 06, 07 or 08	of the usufructuary
UP	Partial usufruct (#)	01, 02, 03, 04, 05, 06, 07 or 08	of the usufructuary
UC	Joint usufruct (#)	01, 02, 03, 04, 05, 06, 07 or 08	of the usufructuary
UL	Usufruct for a term (#)	01, 02, 03, 04, 05, 06, 07 or 08	of the usufructuary

Code	Legal status	Holder type	Surname/Corporate name
UX	Usufruct on condition expressed	01, 02, 03, 04, 05, 06, 07 or 08	of the deceased
US	Successive usufruct	01, 02, 03, 04, 05, 06, 07 or 08	of the second usufructuary
UR	Remainder usufruct	01, 02, 03, 04, 05, 06, 07 or 08	of the second usufructuary

Restriction codes attached to other types of situation:

Code	Legal status	Holder type	Surname/Corporate name
	Donation		
DR	Donor's right of survivorship	blank	blank

PA	Profit-sharing plan (Order 86-1136 of 21/10/86)	blank	blank
SO	Stock options (Act 80-834 of 24/10/80)	blank	blank
EC	Community exclusion	01,02,03,04,05,06,07,08,or blank	Any
SA	Free share plan	01,02,03,04,05,06,07,08,or blank	Any
BS	Business creator shares	01,02,03,04,05,06,07,08,or blank	Any

(#) The "investor type" and "surname/corporate name" are optional.

4.14 Custodian/Administrator code

Title	Length	Type
Custodian/Administrator code	8	AN

Definition

This is the IRI Platform code of the member or sub member making it possible to identify the custodian.

NOTE: This field will remain optional until the checks that render it mandatory and numeric are performed.

Function

This field allows the registrar to know the real custodian/administrator of the securities.

Range of values: IRI Platform Members' Directory.

Occurrences: not applicable.

4.14.1 Transaction categories 1 and 2

IRI file	
IRI01 & IRI02	Header

4.15 Transaction type code

Title	Length	Type
Transaction type code	2	AN

Definition

This code identifies the type of transaction underlying the IRI. This field must be populated.

Function

The value of this field depends on the transaction underlying the IRI (**see SDD French Registered Shares**). For example, for a PTCS monthly settlement trade, the custodian must indicate a transaction type code of CO.

Range of values

The value of this field depends on the type of transaction.

Code	Meaning
2J	Adjustments to other corporate actions without distribution of new securities
3J	Adjustment to transaction in registered securities – public purchase/exchange offer following rejection by the issuer
A1	Transaction involving registered securities - allotment
AJ	Adjustment to a conversion (administered book-entry/bearer and vice versa) following a rejection by the issuer
AT	Succession – amicable partitions and changes to the marriage settlement with change to account- holder
BJ	Adjustment to a conversion (bearer/pure book-entry) following a rejection by the issuer
BO	Ordinary cash trade outside PTCS
BR	Adjustment to cash trade outside PTCS
CA	Conversion (administered book-entry/bearer and vice versa)
CB	Conversion (bearer/pure book-entry)
CC	Conversion (pure book-entry/administered book-entry and vice versa)
CD	Adjustment to conversion (administered book-entry/bearer and vice versa)
CE	Succession – donation inter vivo without change of accountholder
CJ	Adjustment to conversion (administered book-entry/pure book-entry) following a rejection by the issuer

Code	Meaning
CI	Change of account title
CO	Ordinary PTCS monthly settlement trade
CR	Adjustment to PTCS monthly settlement trade
CT	Succession – donation inter vivo with change of accountholder
D1	Transaction involving registered securities – dividends in equity securities
FO	Ordinary PTCS cash trade
FR	Adjustment to PTCS cash trade
GO	Ordinary over-the-counter trade
GR	Adjustment to an over-the-counter trade
IO	Ordinary international trade
IR	Adjustment to international trade
M1	Transaction involving registered securities – mandatory registration in book-entry form
MI	Change of account title
MA	Change of address
MJ	Adjustment to a succession, direct transfer, or change of account title following a rejection by the issuer
ML	Freeing of pledged securities
MO	Ordinary monthly settlement trade outside PTCS
MP	Succession – successions with partition without change to account-keeper
MR	Adjustment to monthly settlement trade outside PTCS
MT	Succession – successions with change to accountholder
MU	Succession – successions without change to accountholder
NA	Pledging of securities
O1	Other corporate actions with distribution of new securities
O2	Other corporate actions without distribution of new securities

Code	Meaning
O3	Transaction involving registered securities – public purchase/exchange offer following a rejection by the issuer
OJ	Adjustment to transaction involving registered securities following a rejection by the issuer
PA	Succession – amicable partitions and changes to the marriage settlement without change to accountholder
PT	Succession – successions with partition with change to accountholder
R1	Bilateral alignments – custodian to issuer
R2	Bilateral alignments – issuer to custodian
RA	Alignments
RJ	Adjustment following a rejection by the issuer
S1	Transaction involving registered securities - subscription
SA	Conversion (administered book-entry/bearer and vice versa) – creation of FOP by ES-M
SB	Conversion (bearer/pure book-entry) – creation of FOP by Euronext Securities Milan
SC	Conversion (pure book-entry/administered book-entry and vice versa) – creation of FOP by ES-M
TD	Direct transfer without changes of accountholder
TJ	Adjustment to transfer of account (TO) following a rejection by the issuer
TM	Succession or direct transfer with change to beneficiary accountholder
TO	Transfer of account
TT	Direct transfer with change of accountholder
VO	Ordinary internal transfer
VR	Adjustment to internal transfer

Occurrences: not applicable.

IRI01	Header

4.16 Security code

Title	Length	Type
Security code	12	AN

Definition

This code is unique and identifies a particular security. It is attributed by French Numbering Agency "Agence française de Codification (AFC)". The format of this field is 12 alphanumeric characters, to prepare for the International Securities Identification Number (ISIN standard – ISO Standard 6166) to be introduced.

This field must be populated.

Function

The security must be admitted to transactions with ES-M and must be consistent with the "reference date for corporate actions" and the "execution date". There can be additional obligations, depending on the type of transaction underlying the IRI (**see SDD French Registered Shares**). If the transaction underlying the IRI is an on-exchange trade, for example, the security must be exclusively registered form.

Range of values: IRI Platform Reference Table.

Occurrences: not applicable.

4.17 Comments

Title	Length	Type
Custodian's comments	80	AN

Definition

This optional field allows the initiator of the IRI to transmit any relevant information to the addressee.

Function

In general, the custodian's comments contain information for the registrar who manages the security. In particular, they should include any additional information required to identify the investor (such as confirmation of actual ownership following a rejection by the registrar).

For IRI of conversion which generates FOP with Transaction type code SC or SB, this data contains the initial date of holding and cost price

In this case, the comment must be populated as follows:

- TPxxxxPRXyyyyyyyyyyyyyyyyPRTz 28 characters with:
 - TPxxxx:
 - TP identifying date of holding
 - characters xxxx contain the year of date of holding
- PRXyyyyyyyyyyyyyyyy:
 - PRX identifying cost price
 - characters yyyyyyyyyyyyyyy contain cost price in cents of euro, must be populated only with 15 numeric characters
- PRTz:
 - PRT identifying cost price type
 - character z contains cost price type, must be populated with one numeric character: 1, 2, 3.

Range of values: not applicable.

Occurrences: not applicable.

4.17.1 Transaction category 1

IRI file	
IRI01 & IRI02	Header

4.18 Comments 1

Title	Length	Type
Comments 1	64	AN

Definition

This field can be used by the registrar who manages the security to add a comment to his response.

Function

This field must be completed (and/or the "Comments 2" field), if the "accepted/rejected code" is "02", "04", "16", "19", "43", "60" or "99".

Range of values: not applicable.

Occurrences: not applicable.

4.19 Comments 2

Title	Length	Type
Comments 2	64	AN

Definition

In addition to the previous field, the registrar who manages the security can also use this field to add a comment to his response.

Function

The value of this field, if populated, varies (**see SDD French Registered Shares**). For example:

- This field can be populated in addition to "Comments 1", if the value of the "accepted/rejected code" is "02", "04", "16", "19", "43", "60" or "99",
- This field must be populated with the former identifier if the registrar has changed it relative to the IRI received; in this case, the value of the "accepted/rejected code" is "02" or "04".

Range of values: not applicable.

Occurrences: not applicable.

4.24 Date IRI recorded at registrar

Title	Length	Type
Date IRI recorded at registrar	8	N

Definition

This field contains the date on which the IRI is recorded at the registrar who manages the register of the security. This field must be populated.

Function

This field enables the custodian who initiated the IRI to know the date on which the IRI was recorded by the registrar who manages the security.

This date does not have to be a trading day but must be earlier than or the same as the date on which the IRI03 file is received by IRI Platform.

Range of values: not applicable.

Occurrences: not applicable.

4.24.1 Transaction category 1

IRI file	
IRI03 & IRI04	

4.25 Execution date

Title	Length	Type
Execution date	8	N

Definition

This date refers to the reference date of the settlement operation in T2S or the effective date of a legal adjustment (such as inheritance, donation, change of account name, address, etc.) that is the subject of the IRI. It corresponds to the date of registration in the register.

The value of this field depends on the transaction underlying the IRI (**refer to SDD French Registered Shares**). In the case of a PTCS trade, for example, the execution date is the date of the trade.

Range of values: not applicable.

Occurrences: not applicable.

IRI07	

4.27 New Execution date of the adjusted IRI

Title	Length	Type
New Execution date of the adjusted IRI	8	N

Definition

In case of non-reconciliation with the settlement or the IRI to be regularized, this field can be used only in IRI 07. It allow the relevant field in IRI 01 to be updated and enables reconciliation in the next batch, once the IRI has been updated, so that it aligns with the settlement or the IRI to be regularized.

Function

The general rules applicable to this date are that it must be:

- A trading day
- The same as the execution date of the original IRI.

4.27.1 Transaction category 1

IRI file	
IRI07	

4.28 Date restriction ends

Title	Length	Type
Date restriction ends	8	N

Definition

This date indicates the end of the restriction in the case of a "usufruct for a term".

This field is mandatory for all IRI01 files received with a "restriction code" UL – (usufruct for a term). It must not be populated in any other case.

Function: not applicable.

Range of values: This date does not have to be a trading day.

Occurrences: not applicable.

4.28.1 Transaction categories 1 and 2

IRI file	
IRI01	Restriction
IRI02	Restriction

4.29 Reference date for corporate actions

Title	Length	Type
Reference date for corporate actions	8	N

Definition

This field enables participants to whom the IRI are addressed to know the date up until which the custodian who initiated the IRI took corporate actions into account.

This field must be populated.

Function

The general rules applicable to this date are that it must be:

- a trading day,
- later than or the same as the execution date of the IRI,
- no earlier than 40 trading days before the date on which the IRI is received by IRI Platform.

Euronext Securities Milan, and the registrar who manages the security, record the IRI after considering corporate actions that have occurred since the reference date indicated on the IRI.

Range of values: not applicable.

4.31 Duration of holding

Title	Length	Type
Duration of holding	2	AN

Definition

This field, reserved for securities conferring rights to payment of a loyalty bonus, specifies the number of periods for which the investor has held his securities in registered form.

This field is mandatory in exchanges between ES-M and registrars that only recognize the generic code, and is significant, i.e. not blank, on IRIs relating to:

Type of operations	Codes
Conversions from pure form to administered registered form	TTC "SC" for registration entry form
Transfers of account	TTC "TO" for registration
Loyalty premium alignments	TTC "RA" for registration
Conversions from administered book-entry to pure	TTC "CC" or "SC" for dereg. book-entry form
Adjustments to conversions from administered book-entry	TTC "CJ" for deregistration to pure book-entry form
Transfers of account	TTC "TO" for deregistration
Adjustments to transfers of account	TTC "TJ" for deregistration
Transactions involving registered securities - allotment	TTC "A1" for registration
Bilateral alignments – from custodian to registrar	TTC "R1" for registration
Bilateral alignments – from registrar to custodian	TTC "R2" for registration
Pledging of securities	TTC "NA" for registration
Freeing of pledged securities	TTC "ML" for deregistration
Change of account title	TTC "CI" for reg. or dereg.

Type of operations	Codes
Successions	TTC "MU" for reg. or dereg.
	TTC "MT" for reg. or dereg.
	TTC "MP" for reg. or dereg.
	TTC "PT" for reg. or dereg.
	TTC "CE" for reg. or dereg.
	TTC "CT" for reg. or dereg.
	TTC "PA" for reg. or dereg.
	TTC "AT" for reg. or dereg.
	TTC "MJ" for reg. or dereg.
	TTC "TM" for registration

It is not used (left blank) for other transactions.

It is never used (left blank) on IRIs exchanged between Euronext Securities Milan and custodians or registrars that use specific codes.

Function

This field enables:

- Euronext Securities Milan to perform the cross-coding of IRIs and FOPs,
- the registrar who recognizes only the generic code to record securities by date.

Range of values:

Duration	Meaning
00	Less than 1 period – generic code
01	1 period – loyalty code
02	2 periods – loyalty code
03	3 periods – loyalty code
04	4 periods – loyalty code
99	Longer than the period set by the – premium code

Occurrences: not applicable.

4.32 Investor Identifier

Title	Length	Type
Investor Identifier	23	N

Definition

This is an identification number, attributed by the registrar who manages the security when the security is first registered in the holder's account. The choice of code is entirely up to the registrar.

In general, this field is optional. However, it must be populated in certain cases (**see SDD French Registered Shares**), such as a transfer of account IRI for registration created by the registrar and a response sent accepted by the registrar.

Custodians are also required to input the "Investor identifier" field on the IRIs that they issue (IRI01 files) when they know it.

Function

If the identifier is not input (i.e. with zeros), the check digit must not be input (i.e. 00) either.

Range of values: not applicable.

Occurrences: not applicable.

4.34 Accounting day for the IRI of registration sent previously

Title	Length	Type
Accounting day for the IRI of registration sent previously	8	N

Definition

This optional field corresponds to the accounting day for an IRI of registration transmitted previously.

Function

This field, associated with the "number of the IRI of registration sent previously", can be used as a provisional identifier until the custodian who initiated the IRI knows the investor identifier attributed by the registrar who manages the security.

This field must be left blank in certain cases (**see SDD French Registered Shares**), such as a transfer of account IRI for registration created by the registrar.

Range of values

If it is populated, it must be a trading day.

Occurrences: not applicable.

4.34.1 Transaction category 1

IRI file	
IRI01 & IRI02	Header

4.35 Accounting day for the adjusted IRI

Title	Length	Type
Accounting day for the adjusted IRI	8	N

Definition

This is the Euronext Securities Milan accounting day for the IRI to be adjusted, i.e.:

- following a rejection by the registrar who manages the security,
- to correct an error made previously (IRI sent incorrectly or for too large quantity).

In general, this field is optional. However, it is mandatory for all adjusted IRI01 files - IRI sent.

Function:

The general rules applicable to this date are that it must be:

- a trading day,
- the same as the date of the accounting day for the original IRI.

Together with the other data relating to the adjusted IRI, this field establishes a link between the adjusted IRI and the original IRI for adjustment.

Range of values: not applicable.

Occurrences: not applicable.

4.36 Accounting day for the IRI Platform for regularisation

Title	Length	Type
Accounting day for the IRI Platform for regularization	8	N

Definition

This is the IRI Platform accounting day for the IRI to be regularized, i.e.:

- following a rejection by the registrar who manages the security,
- to correct an error made previously (IRI sent incorrectly or for too large quantity).

In general, this field is optional. However, it is mandatory for all adjusted IRI01 files - IRI sent

Function: not applicable.

The general rules applicable to this date are that it must be:

- a trading day,
- the same as the date of the accounting day for the original IRI.

Together with the other data relating to the adjusted IRI, this field establishes a link between the adjusted IRI and the original IRI for regularization.

Range of values: not applicable.

Occurrences: not applicable.

4.36.1 Transaction category 1

IRI file	

4.37 Reason for Rejection

Title	Length	Type
Reason for Rejection	60	AN

Definition

This field offers the explanation for the rejection of an IRI by registrar, indicated by the reject code.

This field must be populated on all the records of the IRI rejected by registrar.

Function

This field indicates why the IRI was rejected.

Range of values

See the range of values for the "reject code" field.

Occurrences: not applicable.

IRI02	Registration Restriction

4.40 Number of registrations and restrictions

Title	Length	Type
Number of registrations and restrictions	2	N

Definition

This field specifies the total number (which must not be zero) of "registration" and "restriction" records making up the IRI.

This field must be populated.

Function

This field makes it possible to verify that the total number "registration" and "restriction" records actually present is the same as the value indicated in this field. It must also be consistent with the "account title".

Range of values: not applicable.

Occurrences: not applicable.

4.40.1 Transaction categories 1 and 2

IRI file	
IRI01 IRI02	Header Header

4.41 Number of restrictions attached to this registration

Title	Length	Type
Number of restrictions attached to this registration	2	N

Definition

This field indicates the total number of "restriction" records attached to a "registration" record. This field must be populated on all "registration" records.

Function

When the value of this field is not zero, the number indicated of following records must be "restriction" records.

Range of values: not applicable.

Occurrences: not applicable.

4.41.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration
IRI02	Registration

4.42 Record order number

Title	Length	Type
Record order number	2	N

Definition

This is a sequential number that indicates the "physical" position of a record in the account title making up the IRI.

By definition, the first record of the account title is always a "registration" record. Therefore, its order number is 01 (the order number of the "header" record is 00).

This field must be populated.

Function: not applicable.

Range of values: not applicable.

Occurrences: not applicable.

4.42.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.43 IRI number

Title	Length	Type
IRI number	18	N

Definition

This number is attributed by the participant who initiates the IRI. It is the same on all the records that make up the IRI. The first four characters on the left must be zeros. These four characters are reserved for the IRI platform.

This field must be populated.

Function

The choice of numbering is up to the participant who initiates the IRI. However, the same number must not be attributed to more than one IRI in a batch of IRI with the same custodian and the same initiating participant.

Range of values: not applicable.

Occurrences: not applicable.

4.44 Number of the IRI for registration sent previously

Title	Length	Type
Number of the IRI for registration sent previously	18	N

Definition

This field must contain the number of an IRI for registration transmitted previously either via the IRI platform or directly to the registrar who manages the security.

In general, this field is optional.

Function

This field can be used as a provisional investor identifier until the custodian who initiates the IRI knows the investor identifier attributed by the registrar who manages the security. The Euronext Securities Milan accounting day for the IRI of registration sent previously" must also be populated when the IRI has transited via IRI platform.

This field must be populated in certain cases (**see SDD French Registered Shares**), such as when the "investor identifier" has not been populated, with the exception of a IRI for deregistration with a TTC of "CO" or "RJ".

This field must not be populated in certain cases (**see SDD French Registered Shares**), such as transfer of account IRI for registration created by the registrar.

Range of values: not applicable.

Occurrences: not applicable.

4.44.1 Transaction category 1

IRI file

4.45 Adjusted IRI number

Title	Length	Type
Adjusted IRI number	18	N

Definition

This is the number of an IRI for adjustment:

- following a rejection by the registrar who manages the security,
- to correct an error made previously (IRI sent incorrectly or for too large a quantity).

In general, this field is optional. However, it is mandatory for all adjusted IRI01 files - IRI sent.

Function

Together with the other data relating to the adjusted IRI, this field establishes a link between the adjusted IRI and the original IRI for adjustment.

Range of values: not applicable.

Occurrences: not applicable.

4.45.1 Transaction category 1

IRI file	
IRI01 & IRI02	Header

4.46 Batch number

Title	Length	Type
Batch number	5	N

Definition

This number identifies every IRI file at application level. It is a number in ascending chronological order attributed by the participant who initiates the IRI file.

This field must be populated.

Function

This field makes it possible to detect any IRI files transmitted in duplicate.

A batch contains between 1 and n IRIs. Every session of IRI files is identified by a unique batch number. If the batch number is zero, this means that the maximum number permitted (99999) has been reached.

The participant who initiates the IRI files can choose to use the entity number on the "start of entity" record, according to the standard applied to electronically transmitted files, or a different number.

Range of values: not applicable.

Occurrences: not applicable.

Occurrences: not applicable.

4.48.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.49 Securities quantity

Title	Length	Type
Securities quantity	15	N

Definition

This field indicates the number of securities involved in the transaction underlying the IRI. For account title change IRIs (transaction type code MI/MA), this field must be populated with zeros, as the transaction applies to all the securities.

This field must be populated.

Function: not applicable.

Range of values: not applicable.

Occurrences: not applicable.

4.50 Transaction reference

Title	Length	Type
Transaction reference	16	AN

Definition

This is the reference to the transaction underlying the IRI.

In general, this field is optional.

Function

When this field is populated, it enables participants to align IRIs with the same reference.

This reference also enables IRI Platform to form a batch with the IRIs from the same succession file, direct transfer file or change of account title.

This field must be populated for succession, direct transfer or change of account IRIs.

Range of values: not applicable.

Occurrences: not applicable.

4.51 Reference for the associated securities movement

Title	Length	Type
Reference for the associated securities movement	16	AN

Definition

This is the reference for the securities movement with which the IRI is associated. In general, this field is optional, but it is highly recommended in most cases.

Function

When this field is populated, it enables participants to align the securities movement associated with the IRI(s).

The value of this field, when it is populated, depends on the transaction underlying the IRI (**see SDD French Registered Shares**). In the case of an PTCS trade, for example,

this field is populated with the reference of the transaction notice referring to the orders adjusted by the custodian and the broker firm in the PTCS system.

This field is mandatory in certain cases (**see SDD French Registered Shares**), such as:

- In the case of corporate actions IRIs
- In the case of conversion IRIs

In the case of IRIs for registration created by the registrar who manages the security within the framework of file Transfers, succession and direct transfers. If this field was populated on the received IRI it must be identical to the created IRI for registration from the deliverer.

Range of values: not applicable.

Occurrences: not applicable.

4.52 New Reference for the associated securities movement

Title	Length	Type
New Reference for the associated securities movement	16	AN

Definition

This is the new reference for the securities movement with which the IRI is associated. In general, this field is optional, but it is highly recommended in most cases.

Function

When this field is populated, it enables participants to align the securities movement associated with the IRI(s).

The value of this field, when it is populated, depends on the transaction underlying the IRI (**see SDD French Registered Shares**). In the case of an PTCS trade, for example, this field is populated with the reference of the transaction notice referring to the orders adjusted by the custodian and the broker firm in the PTCS system.

This field is mandatory in certain cases (**see SDD French Registered Shares**), such as:

- In the case of corporate actions IRIs
- In the case of conversion IRIs
- In the case of IRIs for registration created by the registrar who manages the security within the framework of file Transfers, succession and direct transfers. If

this field was populated on the received IRI it must be identical to the created IRI for registration from the deliverer.

4.53 Platform reference for the IRI

Title	Length	Type
Platform reference for the IRI	33	AN

Definition

This field is attributed by the IRI Platform, upon receipt and after checks performed on the IRI sent (IRI02 file).

Function

This field guarantees that a IRI is unique. It enables all the participants concerned by the IRI to communicate on the basis of the same reference.

Range of values: not applicable.

Occurrences: not applicable.

4.53.1 Transaction category 1

IRI file

4.54 Platform reference for the associated IRI

Title	Length	Type
Platform reference for the associated IRI	18	AN

Definition

This is the IRI Platform reference for an IRI connected to another IRI.

In general, this field is optional. However, it must be populated on an IRI for registration created by the registrar who manages the security in the framework of file Transfers, successions and direct transfers. It is taken from the transferor custodian's transfer of account IRI for deregistration and from IRIs for registration of successions or direct transfers. **(see SDD French Registered Shares).**

Function: not applicable.

Range of values: not applicable.

Occurrences: not applicable.

4.57 Street

Title	Length	Type
Street	32	AN

Definition

This field provides information on the investor's address designed to facilitate postal delivery, namely the street number, the type and the name of the street.

This field is optional.

Function: not applicable.

Range of values: not applicable.

Occurrences: not applicable.

4.57.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

4.58 Transaction direction

Title	Length	Type
Transaction direction	1	AN

Definition

This field indicates whether the transaction involves a registration or a deregistration, i.e., an addition to or a deletion from the investor's account.

This field must be populated.

Function: not applicable.

Range of values:

Direction	Meaning
I	IRI for registration (<i>inscription</i>)
R	IRI for deregistration (<i>radiation</i>)

Occurrences: not applicable.

4.58.1 Transaction categories 1 and 2

IRI file	
IRI01 & IRI02	Header

4.59 Direction of the adjusted IRI

Title	Length	Type
Direction of the adjusted IRI	1	AN

Definition

This is the direction of the IRI for adjustment:

- following a rejection by the registrar who manages the security,
- to correct an error made previously (IRI sent incorrectly or for too large a quantity).

In general, this field is optional. However, it is mandatory for all adjusted IRI01 files - IRI sent.

Function

The value of this field depends on the type of transaction underlying the IRI (**see SDD French Registered Shares**). On a IRI with a "transaction type code" that ends in "J", for example, the value of this field must be the same as that on the original IRI.

Together with the other data relating to the adjusted IRI, this field establishes a link between the adjusted IRI and the original IRI for adjustment.

Range of values:

Direction	Meaning
I	IRI for registration
R	IRI for deregistration

Occurrences: not applicable.

4.59.1 Transaction category 1

IRI file	
IRI01 & IRI02	Header

4.60 Personal title

Title	Length	Type
Personal title	32	AN

Definition

This field can be used to provide additional information on the holder of the securities, if the latter expressly wishes this information to appear (title of nobility, etc.).

This field is optional.

Function

This field can be stored and used by the participant to whom the IRI is addressed, although it has no legal value.

For a transfer of account, if the deliverer custodian fills in this field on the IRI for deregistration, the registrar who manages the security must include it on the IRI for registration addressed to the beneficiary custodian.

Range of values: not applicable.

Occurrences: not applicable.

4.60.1 Transaction categories 1 and 2

IRI file	
IRI01	Registration Restriction
IRI02	Registration Restriction

Record type

Title	Length	Type
Record type	1	N

Definition

This indicator identifies the different types of record that make up an IRI. This field must be populated.

Function: not applicable.

Range of values:

Type	Meaning
1	"Header" record
2	"Registration" record
3	"Restriction" record

Occurrences: not applicable.

4.60.2 Transaction categories 1 and 2

IRI file	
IRI01	Header Registration Restriction
IRI02	Header Registration Restriction

4.61 Securities Account type

Title	Length	Type
Securities Account type	1	AN

Definition

This mandatory field indicates the type of securities account that makes up the IRI.

Function

The value of this field depends on the type of account title. It must be consistent with all the fields that make up the account. It defines the structure of the IRI as follows:

Account title Type = 0: *Physical or legal person without restriction*

The IRI is comprised of only one "registration" record. This type of account applies to:

- securities held by a physical or legal person, excluding joint accounts
- securities under joint tenancy or tenancy in common, securities held by an unincorporated investment fund (FCP) or by an investment club, for which the holder's identifier is known and populated on the IRI. In this case, the single "registration" record indicates the representative of the joint owners, the representative of the naked owner, the name of the FCP, or the name of the investment club.

Account title Type = 1: *Joint securities accounts with or without restriction*

The IRI is comprised of at least two "registration" records, which can be followed by one or more "restriction" records. This type of account applies to securities held by physical persons that come under the agreement on joint securities accounts (*convention sur comptes-joints de titres*).

Account title Type = 2: *Physical or legal person with a restriction*

The IRI is comprised of at least one "registration" record and at least one "restriction" record. This type of account applies to securities held by physical or legal persons, excluding joint accounts.

Account title Type = 3: *Joint tenancy*

The IRI is comprised of at least two "registration" records, the first being by convention the representative of the joint tenancy. The "registration" records can be followed by one or more "restriction" records.

Account title Type = 4: *Usufruct and naked ownership*

The IRI is comprised of at least two "registration" records and at least two "restriction" records. The IRI must have the following structure:

- the first "registration" record indicates the naked owner or representative of the naked ownership; it is followed immediately by a "restriction" record (code NP),
- the second "registration" record indicates the usufructuary; it is also followed immediately by a "restriction" record.

Other "Registration" records can follow:

- in the case of joint naked ownership, each of the other naked owners gives rise to a "registration" record immediately followed by a "restriction" record (code NP),
- when there are other usufructuaries, each of the other usufructuaries gives rise to a "registration" record immediately followed by a "restriction" record indicating the type of usufruct.

Account title Type = 5: *Unincorporated investment fund (Fonds Commun de Placement)*

The IRI is comprised of three "registration" records. The IRI must be structured as follows:

- the first record indicates the name of the FCP,

- the second record indicates the name and address of the manager of the FCP,
- the third record indicates the name and address of the depositary of the FCP.

Account title Type = 6: *Investment club*

The IRI is comprised of two "registration" records. The IRI must be structured as follows:

- the first record indicates the name of the club,
- the second record indicates the surname, forenames and address of the representative of the club.

Range of values

Code	Meaning
0	Physical or legal person without restriction
1	Joint securities accounts with or without restriction
2	Physical or legal person with a restriction
3	Joint tenancy
4	Usufruct and naked ownership
5	Unincorporated investment fund (<i>Fonds Commun de Placement</i>)
6	Investment club

Occurrences: not applicable.

4.61.1 Transaction categories 1 and 2

IRI file	
IRI01 & IRI02	Header

4.62 Birth date

Title	Length	Type
Birth Date	8	AN

Definition

This field can be used to provide the date of birth of the shareholder

This field is optional.

Function

If provided, the date must be strictly earlier than the current date.

If provided, the date must comply with the standard format YYMMDD and be numeric.

If there is no date of birth (or if it is not compliant), the field must be filled with 8 blanks. If the date does not comply with the YYMMDD format or if the data is not equal to 8 zeros, the IRI will be rejected with the comment "format not compliant with the data" via an IRI 05.

This data must only be entered for the registration of rank 1, as soon as it is known by the Custodian.

Range of values: not applicable.

Occurrences: not applicable.

4.62.1 Transaction categories 1 and 2

IRI file	
IRI01	Matriculation

4.63 Phone number

Title	Length	Type
Phone Number	15	AN

Definition

This field indicates the holder's telephone number.

This field is optional.

Function

Numbers must be in the format [+][country code][subscriber number including area code] and may contain a maximum of fifteen digits.

The "plus" sign must be the first character, followed by at least one numeric character.

There must be no spaces, letters, or special characters (other than the initial plus sign).

Example: +33611223344

If there is no telephone number (or if the number is not compliant), the field must be filled with 15 blanks.

If the telephone number does not comply with the format or if the data is not equal to 15 zeros, the IRI will be rejected with the comment "format not compliant with the data" via an IRI 05.

This data must only be entered for the registration of rank 1, as soon as it is known by the custodian.

Range of values: not applicable.

Occurrences: not applicable.

4.63.1 Transaction categories 1 and 2

IRI file	
IRI01	Matriculation

4.64 E-mail Address

Title	Length	Type
Email address	208	AN

Definition

This field can be used to provide the holder's email address.

This field is optional.

Function

The "@" sign must be present starting from the second character of the field, and a "dot" must appear after the at sign, with at least one non-blank character in between, and at least one non-blank character after.

- Example: a@b.c (minimum)

If there is no email address, the field must be filled with 208 blanks.

If the email address does not comply with the format or if the data is not equal to 208 zeros, the IRI will be rejected with the comment "format not compliant with the data" via an IRI 05.

This data must only be entered for the registration of rank 1, as soon as it is known by the participant.

Range of values: not applicable.

Occurrences: not applicable.

4.64.1 Transaction categories 1 and 2

IRI file
