
Guidelines to Euronext European Offering Client Test Pack for DUTCH REGISTERED SHARES

1. DUTCH REGISTERED SHARES testing is important, and a client win in the European Expansion context

Dutch Registered Shares are a key service within Euronext's European Expansion programme, providing clients with a secure, transparent and harmonised solution for managing registered shares in the Netherlands. As cross-border investment and regulatory requirements increase, clients benefit from streamlined processes, enhanced compliance and improved operational efficiency. This service enables issuers, custodians and investors to manage Dutch registered shares seamlessly alongside other European securities, supporting growth, reducing risk and ensuring a consistent client experience across markets.

Important: If you have opted for this service, you must participate in these tests to ensure your systems are fully compatible and compliant.

This document provides guidance for new and existing clients engaging with the Euronext European Offering. It covers how to access the test pack, interpret test cases and scenarios, seek assistance and many more.

Basically, this document is written as a run book and guiding the reader through a logical flow of questions, we believe any reader will have. It helps to put the test pack material into best practice.

Clients can find detailed Services description documents at the following page:

[European Offering Documentation | Euronext Securities](#)

2. **Getting to the test pack documentation**

The test pack is available via the Euronext client portal at the next location:

<https://www.euronext.com/en/post-trade/euronext-securities/milan/membership/csd-expansion-documentation>

Detailed technical information, service descriptions, and connectivity requirements are available on [our webpage](#). Further details on connectivity options can specifically be found in the Connectivity Service Description Document.

You will receive login credentials from your Euronext account manager.

Once logged in, navigate to the "Testing" section and select "European Offering Test Pack".

If you have not received your credentials, please contact your account manager or the Euronext support team.

3. **What does the Euronext European Offering Test Pack contain?**

The Client Test Pack is a comprehensive resource designed to support your testing activities.

With the Client Test Pack, your testers will have everything required to efficiently start, carry out and document the results of your testing activities.

First, it includes a range of test cases and scenarios. These comprehensive set of test cases and test scenarios are covering all core functionalities of the Euronext European Offering. Then main characteristics of the tests are:

- They are prioritised as high, medium or low, to ensure that the most important tests are completed first.
- Some tests are straightforward single-step cases, while others are multi-step scenarios, providing thorough coverage of your requirements.
- Each test is tailored to a specific service, user role and set of test conditions.
- All tests have a similar structure like description, preconditions, steps to execute, expected results, and references to related documentation.
- The tests are delivered in a simple tabular structure in Excel. Doing so makes our test case and scenarios accessible, tool independent and should allow you to upload them in most test management tools. To upload the tests, you may need to apply some mapping rules (please refer to the instructions of your test management tool in this case)

In the tabular list of test cases/scenarios for DUTCH REGISTERED SHARES, the reader can find the tests required to validate the next elements:

Area tested	Description
Creation and allocation of shares	Tests the process for creating and allocating administrative shares.
Delivery and settlement instructions	Validates debit and credit instructions for securities delivery and settlement.
Account management	Covers transitions between different account types (UIS, NIS, CS, IOB).
Corporate actions	Tests handling of events such as dividend payments.
Additional securities delivery	Checks processes for supplementary delivery of securities.
Conversion of securities	Validates conversion between registered, dematerialised and re-registered forms.
Withdrawal and redemption	Tests operations for withdrawal and redemption of shares.
Error management	Assesses handling of unauthorised or negative operations.
Daily reconciliation	Verifies daily reconciliation of accounts and balances.

Roles involved:

- Issuer: Initiates and approves share-related operations.
- Issuer agent: Executes instructions and manages technical processing.
- Custodian: Safeguards securities and ensures correct settlement.
- Register & AGM team: Maintains the register and oversees annual general meeting processes.

Activities tested:

- Instruction creation and validation
- Account transitions and updates
- Processing of corporate actions
- Error detection and management
- Reconciliation and reporting

Typical results checked:

- Correct allocation and settlement of shares
- Accurate account balances and transitions
- Proper execution of corporate actions (e.g. dividends)
- Timely detection and resolution of errors
- Consistency and accuracy in daily reconciliations

These tests ensure robust, compliant and efficient management of Dutch registered shares and related operations.

Clients can find detailed Services description documents at the following page:

Next, the exhaustive overview of the template items and a short explanation can be found here:

Ref_Key	Status of test case	Used for Euronext test preparation only
Priority	<i>Test relevance gives the tester a clear indication of the importance of the test. High Priority test cases and scenarios are to be executed first. The different indications can be:</i>	High Priority
		Medium Priority
		Low Priority
		Not to be tested
Test Design Status*	<i>This field is not relevant for test execution but is used only to track the test design activities.</i>	<i>Under Construction</i>
		<i>Review ongoing</i>
		<i>Approved by PO</i>
TEST Case	<i>Numerical ID of the test case</i>	
ETA	<i>Planned date for completion</i>	
Main Topic	<i>General topic object of the test case</i>	
Functionality	<i>Specific functionality of the test case</i>	
Application	<i>Application or module being tested</i>	

Role / User Profile	<i>Type of client targeted by the test case</i>	
Pre-requisites	<i>Conditions or setup needed before testing</i>	
Dependencies	<i>Tests or systems that must be completed first</i>	
References	<i>Related documents or requirements</i>	
Description	<i>Detailed description of the test case</i>	
Expected Result	<i>Anticipated outcome of the test</i>	
Testing status	<i>Specify test outcome</i>	To Do
		Passed
		Failed
		On Hold
		N/A
		Blocked
Testing Comments	<i>Report notes / comments if needed</i>	
Last Day Execution	<i>Specify test execution date</i>	
BUG Ref	<i>Identifier for any bugs found</i>	

Second, the pack also contains **clear references** to the test data to be used, as well as all the documentation you will need to begin, execute and report on your tests. In our test pack we have the particular ISIN-codes included for your testing.

Third, there are **guidelines for conducting the tests** (covered by this document) ensuring you have step-by-step support throughout the process.

4. **What is the test execution process to follow?**

1. **Register for the tests**

You should complete your registration for the tests by submitting the form via the link below:

[European Expansion - Client Testing – Fill in form](#)

2. **Familiarise yourself with the test pack**

We recommend that you first take some time to review the Client Test Pack materials. If you have any questions or need further guidance, please contact CSD.Onboarding@euronext.com

- a. Review all materials in the Client Test Pack to understand the scope, objectives and structure of the tests.
- b. Refer to the guidelines and contact points if you need clarification.
- c. Participate to the preparation meetings that will run before the Client Test Execution Window opens. This is a great opportunity to raise any question related to the client test pack.

3. **Prepare for testing**

- a. Ensure you have access to all required documentation, test data and tools.
- b. Confirm that all prerequisites or pre-conditions for each of the tests are met.

4. **Select tests to execute**

- a. Start with high priority tests, as indicated in the test pack.
- b. If a specific sequence is provided, follow the order prescribed in the table.

5. **Execute the test**

- a. Follow the steps described in the test case or scenario.
- b. To successfully execute any of the tests we advise the next steps:
- c. If a specific order is indicated in the table, please follow that sequence.
- d. If specific referential data is to be used, check if this is available for your test.
- e. Conclusion: before running a test, ensure that all prerequisites or pre-conditions are met.
- f. Carefully perform each action as outlined.

- g. If any test scenario would require a sequence of actions to be carried out by a role play of different actors (roles), please inform the next tester after your part of the steps has been completed. That way the workflow can run at high pace without waiting or interruption.

Important: Testing with Euronext Securities for the European Offering is conducted using a dedicated test environment that mirror, as closely as possible, the target production set-up. The environment is EUA (connected to T2S UTEST) and is made available to support consistent and reliable test execution across all services in scope.

As a general principle, the test environment required for the European Offering is available and operational during normal working hours throughout the testing period. This availability applies across the different services and infrastructures from Euronext Securities and is intended to provide participants with stable access for test execution, analysis, and retesting activities.

The test environment will remain open also after the testing period is completed, however please note that (1) sign-off must be completed as part of the testing period, and (2) support from Euronext Securities can only be granted on an exceptional basis after the testing period.

Any deviations from the standard availability described above, including exceptional incidents or planned maintenance, will be communicated to clients in due time.

6. Validate the outcome

- a. Compare the actual result with the expected result stated in the test pack.
- b. Note any differences or unexpected outcomes.

7. Record the test status

- a. Update the status field for each test as executed, passed or failed. This is not mandatory and Euronext has no means to verify it. But you can log the outcome/status in the Excel sheet under the status field provided.
- b. If you do so and you share the excel once a week with the Euronext Client Test Support team we can consolidate the information in a more factual dashboard.

8. Report defects

- a. If a defect is identified, document it according to the instructions provided in the test pack.
- b. Include all relevant details to support investigation and resolution.

9. Repeat for remaining tests

- a. Continue with the next test, following the same process until all assigned tests are completed.

Important: If you encounter any defects during testing, please report them as described later in the document. We remind the client that Euronext will only track and report based on the fact based information shared by the client or by our internal Client Test Support members.

5. Do we share the progress with others?

As describe in the Client Test Strategy, there will be structural meetings organized where any issue, defect, progress or question can be shared. Of course, confidentiality will be kept in mind.

A report will be delivered soon after each meeting and shared on the portal to keep all participants in the test execution informed.

6. Where can I seek help if I encounter issues?

- For technical issues or questions about the test pack, contact the Euronext support team at CSD.Onboarding@euronext.com.
- For business or account-related queries, reach out to your Euronext account manager.
- Additional resources, including user guides and FAQs, are available on the Euronext client portal.

7. Additional Resources

- Glossary of terms: <https://www.euronext.com/en/post-trade/euronext-securities/milan/membership/csd-expansion-documentation>
- Support contact details: CSD.Onboarding@euronext.com

8. Conclusion

We are committed to supporting you throughout your onboarding and testing process. Please do not hesitate to reach out for assistance or clarification at any stage.
